

### Hello CIPHER teams!

Since our last newsletter we have seen a significant increase in recruitment.

*Well done to all sites that have recruited so far!*

### Recruitment Update

Target: **4000**

Participants recruited: **552**

Sites open to recruitment: **62**

We have reached...

participants!

### TOP 10 Recruiting Sites

Below are the top 10 recruiting sites in the CIPHER study.

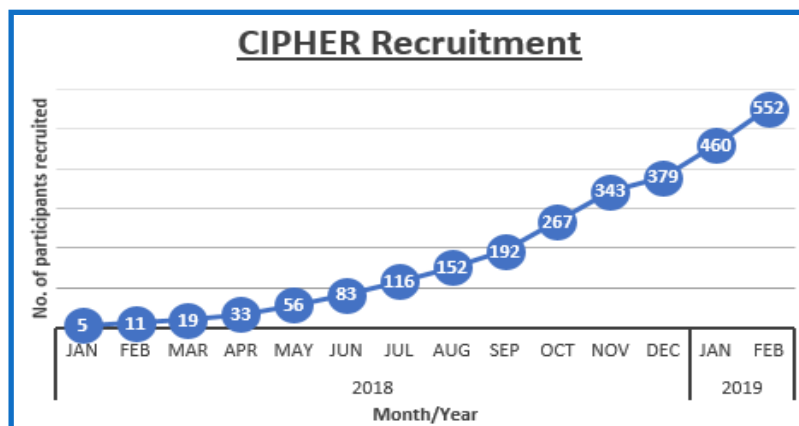

This is based on their average recruitment per month

based on the number of months they have been open.

Rank	Site	Average/ month
1	Royal Devon and Exeter	2.7
2	University Hospitals Coventry and Warwickshire	2.5
3	Queen Elizabeth Hospital King's Lynn	2.4
4	University Hospitals Birmingham	2.1
5	Norfolk and Norwich University Hospitals	1.8
6	University Hospital of Wales, Cardiff	1.6
7	Cambridge University Hospitals	1.5
8	Basildon and Thurrock University Hospitals	1.5
9	Wythenshawe Hospital	1.5
10	University Hospitals of Morecambe Bay	1.4

All data present in the newsletter is accurate up until 28/02/2019.

Note: These figures may change as additional data is added to the database.

### Recent Substantial Amendment

Substantial amendment 1 was recently approved. The amendment included the addition of **loop ileostomies** and **retrospective consent**.

Please remember to refer to the **10-step guide to recruiting a CIPHER participant**.

There is a guide for prospective consent and one for retrospective consent.

All sites should now be using **PIL v5.0 07/11/2018**.

### CONTACT US!

If you have any questions, please don't hesitate get in touch with the CIPHER study team!

### KEY TIPS FOR SUCCESS!

#### SCREENING

All patients having a stoma formed at your site should be entered onto the screening log. The codes should be used to report ineligible patients and reasons for not consenting.

#### CONSENT FORM

The correct date and version of the PIL must be entered onto the consent form. Participants should write their full name at the bottom of the form.

#### BASELINE PARTICIPANT QUESTIONNAIRE

The baseline participant questionnaire must always be completed before surgery. If the participant is consented retrospectively, the baseline questionnaire must not be completed. This is because the questionnaire must reflect the participant's preoperative state.

#### SURGICAL DATA ENTRY

Data must be entered **promptly**, ideally on the day of surgery or at most within 24 hours. The only exception to this are participants who are consented retrospectively.

#### DATABASE

The database has been updated so that multiple admissions to hospital and CT scans can be added to the follow up forms. Data queries should be resolved as promptly as possible.

#### FOLLOW UP CRF (D Forms)

Data should be collected with the participant, at a routine appointment or over the phone.

**Remember the database links are not the same!**
